

COVID-19

Signs and symptoms

The incubation period
can last from **2-14 days**
before symptoms appear.

Cough

Fever

**Shortness
of breath**

Alert your doctor by phone if you:

1. Develop these symptoms
2. Have come in close contact with someone with COVID-19
3. Have recently traveled to an area experiencing an outbreak

Depending on your case, you may be asked to stay home and rest, or come in for testing
